Amina Bouzenada

Full-Stack Developer · Web & Mobile

Constantine, Algeria
amina.bouzenada.pro@gmail.com
aminabouzenada.github.io/portfolio

PROFILE

Full-stack developer building complete web and mobile products: responsive interfaces with React, mobile apps with Flutter, and the APIs and databases behind them with Node.js, PHP and Python. Freelancer for the past year and co-owner of a product developed with a local company, involved in both the technical work and the product decisions. I care about clean, maintainable code and interfaces that are simple to use.

EXPERIENCE

Freelance Full-Stack Developer

2025 – Present

Self-employed · Remote / Constantine

- Design and build web and mobile applications for clients, from gathering requirements to deployment and maintenance.
- Develop front ends in React and mobile apps in Flutter, connected to REST APIs built with Node.js or PHP.
- Model and manage data with MySQL and MongoDB, and communicate directly with clients on scope, progress and delivery.

Co-owner & Developer

Present

Product built in partnership with a local company

- Co-own and develop a product with a local company, building features across the stack.
- Take part in product decisions and work directly with the business side to turn needs into features.

SELECTED PROJECT

Dzair Tech: e-commerce store with admin dashboard

2026

Live demo · Source code

- Bilingual French/Arabic online store for an Algerian tech business, with a full right-to-left layout and product variants (storage, color, configuration) that update the price.
- Checkout adapted to the local market: delivery to all 58 wilayas priced by zone, home or stop-desk delivery, Algerian phone validation and cash on delivery.
- Admin dashboard with revenue and sales trends, a daily revenue chart, order management (status workflow, search, CSV export) and product management (create, edit, hide, photo upload).

Tech: React, Vite, React Router, Context API, responsive CSS

SKILLS

Front end & mobile

React · Flutter · JavaScript · HTML & CSS

Back end

Node.js · PHP · Python · REST APIs

Databases & tools

MySQL · MongoDB · Git
